

Palm Pilot Compatibility

All Steffes 2100, 3100, 4100, and 5100 series heating systems have the ability to interface with several Personal Data Assistant (PDA) models utilizing the Palm operating system. With the PDA, installers have the ability to monitor system status, do troubleshooting, download new equipment software, edit program settings within the equipment, and more. An interfacing and program software kit is required to utilize this option and can be ordered directly from Steffes Corporation.

A listing of known PDA models that work with the Steffes software and interface kit include:

Palm Pilot 3/7 Interface Cable (1301022) PRICE: \$75	Palm Pilot M100 Interface Cable (1301024) PRICE: \$75	Palm Pilot 5 Interface Cable 1301026) PRICE: \$75	Palm Pilot Universal Interface Cable (1301028) PRICE: \$75	Multi-Connector Interface Cable PRICE: \$110
