

PRESSURE REGULATING BLOWER

The Steffes Pressure Regulating Blower is a reliable solution to help reduce tank pressure and can help reduce the risk of methane leaking into the atmosphere from the thief hatch. Our unit comes as a prefabricated package with a motorized blower mounted on a skid table and a UL listed controller. Its PLC touch screen makes it easy to use and provides a range of features to safely reduce back pressure and improve well site productivity.

DESIGN FEATURES

- Reduces thief hatch leaking without creating a vacuum at the tanks
- Designed to hold tank pressure at a user-set levels
- A cost-effective solution for new sites or retrofitting old sites
- Adjustable variable speed drive
- PLC touchscreen with data logging capability
- Option for an insulated steel cover or enclosed building which allows the PRB motor to run more efficiently in colder temperatures

ABOUT US

At Steffes, we're more than a manufacturer, we're an experienced team committed to innovation. Whether we're developing an entirely new product or improving the design of an existing product, everything that leaves our building has undergone extensive testing. From our flares, blowers, and controls to our production equipment and oil accessories we won't deliver any product unless we are certain it will perform in the field. We guarantee the quality of our products and pride ourselves in operating as your partner, not just an equipment manufacturer and supplier.

SALES

Our sales team can help you find the solutions needed for your site and remain a phone call away when you need them.

SERVICE

Our services team specializes in installation, support and service of all Steffes Oil and Gas products.

SUPPORT

Our experienced team works together to ensure your product is ready to be produced to the highest quality standards.
